Overview of Lewis Upshur Animal Control Facility

The Lewis Upshur Animal Control Facility is a government-operated entity dedicated to managing animal-related issues within Lewis and Upshur counties. The facility functions as a shelter, enforcement unit, and educational center, ensuring that animals are treated humanely while protecting the community from animal-related risks. Staffed by trained animal control officers and veterinary professionals, the facility handles a wide range of responsibilities including the capture of stray animals, investigation of animal cruelty cases, and disaster response for pets. It maintains a commitment to upholding animal welfare standards and collaborating with local authorities to provide effective animal control services.

Location and Operational Hours

Strategically located to serve the residents of Lewis and Upshur counties, the facility operates Monday through Friday with additional weekend hours for adoptions and emergency services. Accessibility and convenient hours ensure residents can report animal concerns and visit the shelter as needed. The facility also provides contact information for after-hours emergencies, reinforcing its

role as a responsive community resource.

Mission and Vision

The mission of the Lewis Upshur Animal Control Facility centers on promoting responsible pet ownership, preventing animal cruelty, and facilitating the safe care and adoption of animals. Its vision includes fostering a community where animals are valued and public safety is maintained through effective, compassionate animal control practices.

Services Provided by the Facility

The Lewis Upshur Animal Control Facility offers a broad spectrum of services designed to address the diverse needs of animals and residents. These services encompass animal rescue, sheltering, adoption programs, licensing enforcement, and public education. By providing comprehensive animal control solutions, the facility supports both pet owners and the general public in maintaining a safe and healthy environment.

Animal Rescue and Capture

The facility is equipped to respond to calls regarding stray, injured, or dangerous animals. Animal control officers utilize humane capture techniques to safely remove animals from public spaces or situations posing risks to people or other animals. This service helps reduce the number of free-roaming animals and mitigates potential conflicts within the community.

Lost and Found Animal Services

One of the critical functions of the facility involves managing lost and found pets. The shelter maintains records and a holding area for animals brought in by residents or found wandering. Efforts are made to reunite pets with their owners through identification checks, including microchip scanning and local notifications.

Licensing and Regulation Enforcement

The facility assists in enforcing local animal licensing laws and regulations, ensuring pet owners comply with vaccination requirements and registration protocols. This enforcement helps control the spread of diseases and supports responsible pet ownership.

Animal Intake and Shelter Procedures

When animals enter the Lewis Upshur Animal Control Facility, they undergo a standardized intake process designed to ensure their health and safety. This procedure includes assessment, documentation, and placement within the shelter environment. Proper intake protocols are essential for managing the population and preparing animals for adoption or other outcomes.

Initial Assessment and Health Screening

Upon arrival, each animal is examined by trained staff or veterinary personnel to identify health concerns or behavioral issues. This assessment guides the level of care required and determines quarantine needs to prevent disease transmission. Vaccinations and parasite treatments are administered as necessary during this phase.

Identification and Record Keeping

Animals are assigned identification numbers and entered into the facility's database. Detailed records include physical descriptions, health status, and any relevant history provided by finders or previous owners. Accurate record keeping facilitates tracking and assists in locating lost owners or arranging adoptions.

Shelter Housing and Care

Animals are housed in appropriate enclosures that meet welfare standards, providing comfort and security. Staff monitor the animals daily, providing nutrition, exercise, and enrichment to promote physical and psychological well-being. The facility adheres to strict sanitation protocols to maintain a healthy environment.

Adoption and Rehoming Programs

The Lewis Upshur Animal Control Facility actively promotes adoption as a humane solution to animal overpopulation and homelessness. The adoption program is designed to match animals with suitable, responsible owners and to provide ongoing support throughout the pet ownership experience.

Adoption Process

Prospective adopters undergo a thorough screening process that includes application submission, interviews, and home visits when necessary. This process ensures that animals are placed in safe, caring environments. The facility provides education on pet care and responsible ownership during adoption events.

Spay and Neuter Initiatives

To control the local animal population, the facility offers or partners with clinics to provide spay and neuter services. These programs reduce the number of unwanted litters and contribute to community-wide animal welfare improvements.

Foster Care and Volunteer Opportunities

In addition to direct adoptions, the facility coordinates foster care programs for animals that require special attention or socialization before permanent placement. Volunteers play a critical role in supporting these efforts by providing care, transportation, and community outreach assistance.

Community Education and Outreach

Education is a cornerstone of the Lewis Upshur Animal Control Facility's mission. The facility engages with the public to promote animal welfare, responsible pet ownership, and safety awareness. Through outreach programs, the facility empowers residents with knowledge and resources.

Public Workshops and Seminars

Regularly scheduled workshops cover topics such as pet care, bite prevention, wildlife interaction, and animal behavior. These educational sessions are tailored for various audiences including children, pet owners, and community leaders.

School and Community Partnerships

The facility collaborates with local schools and organizations to foster a culture of compassion and responsibility toward animals. Programs include classroom visits, educational materials, and participation in community events to raise awareness.

Emergency Preparedness and Disaster Response

In the event of natural disasters or emergencies, the facility plays a crucial role in animal rescue and sheltering. Public education on disaster preparedness for pets is part of the outreach effort, helping residents plan for the safety of their animals during crises.

Animal Control Laws and Enforcement

The Lewis Upshur Animal Control Facility operates within the framework of state and local laws governing animal welfare, licensing, and public safety. Enforcement of these laws is essential to maintaining order and protecting both animals and citizens.

Animal Cruelty Investigations

Animal control officers investigate reports of neglect, abuse, and cruelty. The facility works closely with law enforcement and legal entities to ensure proper action is taken against violations and to provide care for affected animals.

Regulation of Dangerous Animals

The facility enforces regulations relating to potentially dangerous or aggressive animals, including quarantine, containment, and behavioral assessments. These measures help prevent attacks and ensure public confidence in local animal control efforts.

Licensing Compliance Monitoring

Regular monitoring and enforcement of pet licensing laws ensure compliance among residents. The facility conducts license checks and issues citations when necessary, supporting community health through vaccination adherence and responsible pet management.

Facility Standards and Animal Care

The Lewis Upshur Animal Control Facility adheres to established standards for shelter management and animal care. These standards encompass physical infrastructure, staff training, and animal welfare protocols to provide a safe and humane environment.

Facility Infrastructure

The shelter is equipped with climate-controlled kennels, exercise areas, and veterinary treatment rooms. These facilities are designed to meet the needs of a diverse animal population and to support efficient operations.

Staff Training and Professional Development

Staff members receive ongoing training in animal handling, disease prevention, and customer service. Professional development ensures that the team remains knowledgeable about best practices and emerging trends in animal control and welfare.

Health and Wellness Programs

Regular health assessments, vaccination protocols, and behavioral enrichment are integral to the facility's care approach. These programs aim to improve animal well-being and increase successful adoption outcomes.

Sanitation and Safety Protocols

Strict sanitation procedures minimize the risk of disease transmission within the shelter. Safety protocols protect both staff and animals, ensuring a secure environment throughout facility operations.

- Regular cleaning and disinfection schedules
- Personal protective equipment for staff
- Proper waste disposal and pest control
- Emergency response planning and drills
