This concept originated as a way to combine the therapeutic effects of yoga with animal-assisted therapy, enhancing the overall experience.

Origins and Concept

The idea of puppy yoga began as an innovative approach to reduce stress and anxiety by blending physical exercise with animal interaction. Puppies, known for their unconditional affection and playful nature, help participants stay present and engaged. This unique combination has proven effective in boosting mood and promoting mindfulness.

Session Structure

In a typical puppy yoga Omaha session, a certified yoga instructor guides participants through a series of poses tailored for all skill levels. Puppies, usually provided by local animal shelters or breeders, are introduced to the environment to socialize with humans. The session often lasts between 45 minutes to an hour, allowing ample time for both yoga practice and puppy playtime.
