Understanding the Wordle Game Format

Wordle is a popular online word puzzle that requires players to guess a hidden five-letter word within six tries. After each guess, the game provides feedback by highlighting letters in different colors to indicate correct letters and correct positions. This feedback mechanism is crucial for players to refine their guesses and pinpoint the target word. The game's format emphasizes vocabulary knowledge, logical deduction, and strategic guessing.

Feedback Mechanism Explained

Each letter guessed in Wordle can be marked with three different colors:

- **Green:** The letter is in the correct position.
- **Yellow:** The letter is in the word but in a different position.
- **Gray:** The letter is not in the word at all.

This color-coded feedback helps players eliminate incorrect guesses and focus on letters that appear in the target word, enabling a logical approach to solving each puzzle.
