Start with Common Vowels and Consonants

Beginning with words containing multiple vowels and frequently used consonants increases the likelihood of revealing correct letters. Words like “SLATE” or “CRANE” are popular among players for this reason. This approach quickly narrows down the list of possible solutions.

Use Process of Elimination

Each guess provides valuable feedback. Letters marked gray should be eliminated from future guesses. Yellow letters should be repositioned in subsequent attempts, while green letters confirm correct placement. Maintaining an organized mental or written list of known and eliminated letters enhances efficiency.

Focus on Letter Positioning

Understanding common letter pairings and word structures can guide players in placing yellow letters correctly. For example, knowing that “PL” is a frequent consonant cluster helps deduce the correct position of these letters in the word for august 23 2023.

Leverage Word Patterns and Length
